

NAC 552

Product sheet

Our preamplifiers epitomise everything we believe in. Starting with our revolutionary NAC 12 back in 1974, Naim Audio preamplifiers have both rewritten the rules and set the standards for others to follow.

The NAC 552 is second only to our Statement NAC S1: its distinctive two-box configuration marks it out from the competition just as surely as its unfettered musicality reflects our core values. It's one of the best preamplifiers we've ever produced, and by extension, among the best in the world.

Key points

- **Two-box configuration** for optimum rejection of electromagnetic interference.
- **AV bypass mode** for simple connection to an existing AV system.
- **Fully suspended sub-chassis** for superior isolation of sensitive circuit boards.
- **Support for both DIN and RCA inputs** to facilitate connection into a wider range of systems.
- **Independent listen and record banks** for maximum flexibility.
- **Assignable inputs** for enhanced usability with a range of sources.
- **Split-rail power supply** featuring 800VA toroidal transformer, three smoothing capacitors and Discrete Regulator (DR).

Specifications

Type	Preamplifier
Analogue Inputs	7 x DIN 2 x RCA
Other Inputs	Two inputs configurable for unity gain
Analogue Outputs	1 x variable, 3 x fixed (DIN)
Line Outputs Fixed (level)	75mV, 600 Ω
Line Outputs Variable (level)	775mV
Output Impedance	<50 Ω w
Load Impedance	10k Ω (min.)
Power Outputs	Naim phono amplifier
Dimensions (HxWxD)	3.4x13.4x12.3" (8.7x43.2x31.4cm)
Weight	28.44lbs (12.9kg)
